Intro

- Poll
- Research and Objectives
- Definitions

What You Need

- An Internet Connection
- An IPTV Player (h/w box, browser, or app)
- IPTV service provider(s)
- Optional
 - Electronic Programming Guide
 - Digital Video Recorder

Factors to Weigh

- Monthly/reoccurring fees vs. free
- Ad-free vs. ad-supported (or both)
 - Are ads skippable?
- Live vs. on-demand content
 - Recordable?
- How often does content change/expire
- Player and EPG Ecosystem

Expensive, Ad-free

- Not going to waste time on these
- Everyone knows these:
 - Netflix, Disney+, Paramount+, Hulu+Live, Sling, YouTube TV, Peacock, Amazon Prime, etc.

Cheap(er), Provider Ad-free

- [Frndly TV](#) (~\$7/mo)
- [Philo TV](#) (\$25-\$33/mo)
- “Ahoy, Matey!”
 - Be careful of services that offer IPTV but at a very low cost
 - These can pirate content, offering for a one-time or very low monthly fee
 - If a streaming service doesn't list its channels or doesn't have an iOS player, likely pirated ([g2g](#))

Free, Ad-Supported

- [Tubi](#)
- [Pluto TV](#)
- [The Roku Channel](#)
- [Plex](#)
- [Airy TV](#)
- Free tiers: [DirecTV](#), [Amazon Freevee](#), [Philo TV](#)

Free, Ad-free

- Is this legit?
 - Yes! If you live in a public library district
- [Kanopy](#)
 - On-demand movies, TV shows, educational videos and documentaries
- [Hoopla](#)
 - On demand movies, TV shows, audiobooks, eBooks, comics, manga, and music.

How Do You Find Stuff?

- [JustWatch](#) and [Reelgood](#)
 - But these are limited and a closed ecosystem
- EPGs
 - Can blend multiple sources and private collection
 - [Open EPG](#)
 - [IPTV-org](#)

Demo/Discussion
