# Notifications And Monitoring

CUCUG
Quentin Barnes
October 15, 2026

# Problem & Old Solution

- Need to know when something happens
- Used to use email-to-SMS gateways
  - echo “msg” | <mycellnumber>@vtext.com
  - Clumsy to use
  - Unreliable, complicated, deprecated

# New Solution

- Dedicated apps can now display notifications for you from your computers
- Some are free in cost or low, one-time fee
  - Ntfy, Pushover, Apprise, Mailrise
- Automated monitoring: Uptime Kuma
