Scanning Lots of Huge and Bound Items

CUCUG
Quentin Barnes
August 20, 2026

Mission: Archive

- My ~40 year-old box of wide, fanfold printouts
- My dad’s tub of folders, notebooks, magazines, newsletters, files, maps, and correspondence

Considered: Current Scanner

- Brother MFC-L2750DW with Duplex ADF
- Cut bindings or do 1000s of pages one at a time
- Only 8.5”x14”, so no maps, newspapers, or most printouts

Considered: New Scanner

- Looked at overhead flatbed scanners
- Expensive
  - Ones that are good, could do handle large enough sizes, and would auto-flatten are around $800 on up
- Once the project is over, sell it?

Local Public Scanners

- Champaign Public Library
- Urbana Free Library
- UIUC Libraries

Champaign & Urbana Libraries

- Basically same equipment (TBS ScanEZ)
  - Urbana has more equipment in its archive room
- ADF and an A3 flatbed (11.7”x16.5”)

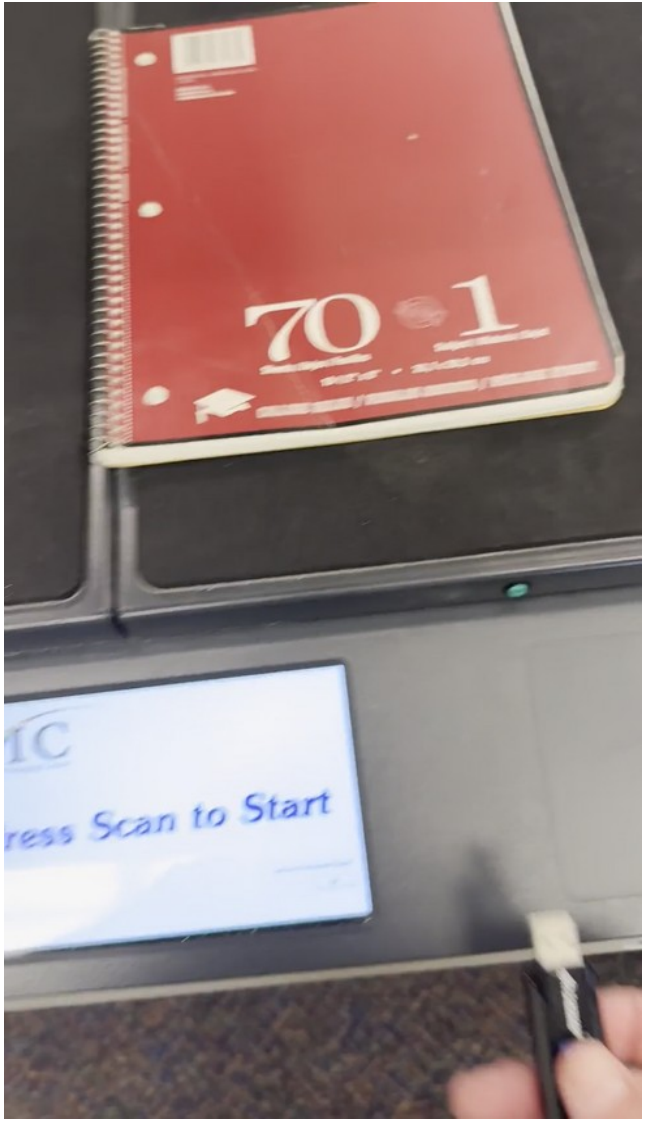

UIUC Libraries

- Yes, completely available to the public
- 16 libraries have scanners
- Media Commons in Main Library has best selection

KIC Bookeye 4 v3

- Has two, in Media Commons (rm 220) and International and Area Studies Library (rm 319)
- Huge scan size, 15.3” × 18.9”
- Optical resolution up to 400dpi (200dpi default)
- Fast! (@200dpi in 1.1s / @400dpi in 3.2s)
- Curve flattener and angled book holder

70 1
ress Scan to Start

Mission Accomplished? Almost...

- Finished my dad’s tub
  - 129 items of ~5300 pages
- Still has some printouts left to do in my box
- OCR
  - Tesseract
  - Claude
